Caution Regarding Forward-looking Statements

Certain portions of this report, including, but not limited to, “Results of Operations” and “Recent Developments”, may contain forward-looking statements about the Fund, including its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Accordingly, assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Annual Management Report of Fund Performance as at March 31, 2024

Fidelity Canadian Monthly High Income ETF

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements for the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-800-263-4077, by writing to us at Fidelity Investments, 483 Bay St. Suite 300, Toronto ON M5G 2N7 or by visiting our website at www.fidelity.ca or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure relating to the investment fund.

Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: Fidelity Canadian Monthly High Income ETF (Fund) aims to achieve a steady flow of income with the potential for capital gains by using an asset allocation approach. It invests primarily in other underlying funds. These underlying funds generally invest in a mix of Canadian and foreign equity securities and fixed income securities, with generally more emphasis on Canadian equity securities and fixed income securities.

Strategies: In order to achieve its investment objective, the portfolio management team generally follows a neutral mix guideline of approximately 60% equity securities and approximately 40% fixed income securities. Depending on market conditions, the portfolio management team may vary the asset mix by up to +/-20% from the neutral mix if it believes this produces the best overall return.

The portfolio management team uses an asset allocation strategy and invests in underlying funds that are managed by Fidelity. The underlying funds invest in any kind of equity securities or fixed income securities, including high yield securities and other lower quality debt securities, with a focus on Canadian equity securities and fixed income securities. When making asset allocation decisions, the portfolio management team may consider factors such as macroeconomic conditions, corporate fundamentals, market valuations and investor sentiment. The portfolio management team decides to which asset class a fund or security belongs based on its investment characteristics. The portfolio management team may also invest in underlying funds that invest in other securities that do not fall within these classes, and that do not produce income.

The Fund invests more than 10% of its net asset value in other underlying funds, which are referred to as third-tier funds. These third-tier funds may, in turn, invest more than 10% of their net asset value in other underlying funds, which would be referred to as fourth-tier funds in relation to the Fund.

Risk

The risks associated with investing in this Fund remain as discussed in the prospectus. Any changes in the Fund over the period have not affected the overall level of risk of the Fund.

The Fund is suitable for medium- to long-term investors who are willing to accept a low-to-medium level of risk and who want the convenience of a balanced diversified portfolio in a single fund. It is for investors who want to gain exposure to Canadian equity securities and fixed income securities, are seeking the potential for both income and capital gains, and can handle the volatility of returns generally associated with equity investments. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

Fidelity Canadian Monthly High Income ETF returned 8.6%, after fees and expenses, for the one-year period ended March 31, 2024. The S&P/TSX Capped Composite Index, broadly representative of the Canadian equity market, returned 14.0% for the same period.

Market overview:

Canadian equities, as measured by the S&P/TSX Composite Index, returned 14.0% for the one-year period ended March 31, 2024.

Canadian equities rose over the review period primarily driven by gains in the information technology sector, coupled with slowing inflationary pressures. Companies in the information technology sector surged as developments linked to artificial intelligence supported their earnings outlook. The annual inflation rate continued to ease to 2.8% in February 2024, the lowest since June 2023, marking a sharp reversal from 3.4% in December 2023. The Canadian economy expanded at an annualized rate of 1.0% in the fourth quarter of 2023. In the labour market, the unemployment rate ticked up to 5.8% in February 2024, after dipping to 5.7% in the previous month. The Bank of Canada (the BoC) pointed to moderating consumer spending and easing price pressures as signs that the tighter monetary policy is working to reduce inflation. Against this backdrop, the BoC held interest rates steady in March 2024, keeping the policy rate at 5.0%, following a 25-basis point increase in July 2023.

Factors affecting performance:

Fidelity Canadian Monthly High Income ETF

Management Discussion of Fund Performance – continued

During the review period, the Fund's benchmark, the Fidelity Canadian Monthly High Income Blend Index, returned 8.1%. This blended index consists of 40.0% Fidelity Canada Canadian High Dividend Index, 20.0% Fidelity Canada Systematic Canadian Bond Index, 20.0% Bloomberg Global Aggregate Bond Index – Hedged CAD, 8.0% Fidelity Canada International High Dividend Index, 6.0% Fidelity Canada U.S. High Dividend Index, and 6.0% Fidelity Canada U.S. Dividend for Rising Rates Index.

The Fund outperformed its benchmark, primarily due to lower-than-benchmark exposure to Canadian systematic bonds, higher-than-benchmark exposure to U.S. high-dividend equities, and out-of-benchmark exposure to emerging markets high-dividend equities. Conversely, higher-than-benchmark exposure to, and security selection in, global investment-grade bonds, and out-of-benchmark exposure to Canadian real return bonds, detracted from relative returns.

Portfolio changes:

During the period under review, the portfolio managers increased the Fund's exposure to U.S. high-dividend equities and initiated a new position in U.S. long-term treasury bonds, while reducing exposure to global investment-grade bonds, Canadian long-term government bonds, and emerging markets high dividend equities, for better risk/reward opportunities elsewhere, in the portfolio managers' view.

Recent Developments

Portfolio managers David Wolf and David Tulk note that the combination of continued resiliency in developed markets and softening of inflation data has increased the probability of a soft landing, as potential productivity growth may be sufficient to counterbalance recession risk. The managers note that, although market participants are debating the quantity and timing of potential rate cuts in 2024, the direction of monetary policies is likely to be towards loosening. While the managers continue to focus on inflation data, they note that if inflation levels continue to moderate, the aggressive monetary tightening by central banks may be behind us; however, it is uncertain how many interest rate cuts may be in store for 2024. They are, however, still mindful about core inflation (which excludes food and energy), which may remain a challenge as the continued strength in the labour market may keep services costs elevated, which is the more persistent part of the inflation basket. As such, they are monitoring the pathway of the labour market. The managers aim to build portfolios that are resilient in a wide range of outcomes. They believe constructing portfolios that are well-diversified across asset classes, styles and regions is the right way to both protect and grow capital over the long run.

Effective September 19, 2023, Anne Bell of Mississauga, Ontario, became a member of the Independent Review Committee (IRC).

Related Party Transactions

Manager and Portfolio Adviser

The Fund is managed by Fidelity Investments Canada ULC (Fidelity). Fidelity is part of a broader group of companies collectively known as Fidelity Investments.

Fidelity provides or arranges for the provision of all general management and administrative services required by the Fund in its day-to-day operations, bookkeeping, record-keeping and other administrative services for the Fund.

Fidelity is the portfolio adviser to the Fund and it provides investment advisory services to the Fund. Fidelity has entered into sub-advisory agreements with a number of entities including Fidelity Management & Research Company LLC, to provide investment advice with respect to all or a portion of the investments of the Fund. The sub-advisors arrange for the acquisition and disposition of portfolio investments, including all necessary brokerage arrangements.

The Fund pays Fidelity a monthly management and advisory fee for their services, based on the net asset value of each Series, calculated daily and payable monthly. The Fund paid Fidelity management and advisory fees of \$12,000 for the period ended March 31, 2024.

Independent Review Committee, Cross-Trading and *In specie* Transactions

Independent Review Committee

Fidelity has established an independent review committee (IRC) that acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals respecting conflict of interest matters referred to it by Fidelity. The IRC prepares, at least annually, a report of its activities for securityholders of the Fund. The report is available at www.fidelity.ca or at the securityholder's request at no cost by contacting Fidelity, using the contact information available on the final page of this document.

Cross-Trading and *In specie* Transactions

The Fund received the approval and standing instructions from the IRC in order to:

Fidelity Canadian Monthly High Income ETF

Management Discussion of Fund Performance – continued

- (i) engage in cross-trading, which is a form of interfund trading. A cross-trade occurs when the Fund purchases or sells portfolio securities from or to another Fund, a U.S. fund or a separately managed account, through a broker;
- (ii) permit the Fund, in certain circumstances, to purchase and redeem Fund securities in consideration for securities rather than cash of another Fund, investment fund or a separately managed account, managed by Fidelity.

For each of the transactions in (i) and (ii) above, the IRC's standing instructions require Fidelity to act in accordance with its associated policies and procedures and applicable law, and comply with the conditions in each of the exemptive relief orders received, which, in the case of cross-trading, requires additional periodic reporting to the Ontario Securities Commission. The standing instructions also require that investment decisions in respect of these transactions (a) are free from any influence by an entity related to Fidelity and without taking into account any consideration relevant to an entity related to Fidelity; (b) represent the business judgment of Fidelity uninfluenced by considerations other than the best interests of the Fund; (c) comply with the applicable policies and procedures of Fidelity; and (d) achieve a fair and reasonable result for the Fund.

Brokerage Commissions

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of Fidelity Investments, including National Financial Services LLC, provided it determines that these affiliates' trade execution abilities and costs are comparable to those of non-affiliated, qualified brokerage firms, on an execution-only basis. Commissions paid to brokerage firms that are affiliates of Fidelity Investments were \$0 for the period ended March 31, 2024. Fidelity receives standing instructions from the IRC in respect of policies and procedures governing best execution of transactions with affiliates, which includes brokers affiliated to Fidelity Investments, at least once per year.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period end of the years shown. This information is derived from the Fund's audited annual and/or unaudited semi-annual financial statements. Please see the front page for information about how you can obtain the Fund's annual or semi-annual financial statements.

Net asset value per security, end of period	\$12.4748	\$11.9613	\$13.0833	\$12.1472	\$10.0617

^A For the period January 7, 2020 (inception date) to March 31, 2020.

^B Per security amounts and number of securities outstanding reflect, retroactively, a 2:1 unit split effective as of March 4, 2021. All relevant security and per security historical data prior to March 4, 2021, has been adjusted to reflect the split.

^C This information is derived from the Fund's audited annual and/or unaudited interim financial statements. The net assets attributable to securityholders per security presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to financial statements. For reporting periods ending after January 1, 2017 per security comparative figures (except for net asset value per security, end of period) have been conformed to the current rounding presentation of two decimal places.

^D Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of securities outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per security.

^E Prior period amounts may have been adjusted.

^F Distributions were paid in cash or reinvested in additional securities of the Fund, or both, and excludes any applicable distributions of management fee reduction to securityholders. Distributions are presented based on management's best estimate of the tax character.

^G This information is provided as at period end of the year shown.

^H Beginning on February 8, 2021 and ending on August 8, 2021, the manager of the Fund waived a portion of the Fund's management fees. From time to time the manager may decide, in its discretion, to waive a portion of a fund's management fees. The manager is under no obligation to do so and, if any portion of a management fee is waived by the manager, it may discontinue this practice at any time without notice.

^I Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset values during the period, including the Fund's pro-rata share of estimated expenses incurred in any underlying investment fund, if applicable, (2024: .44%, 2023: .43%, 2022: .41%, 2021: .39%).

^J The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period, including the Fund's pro-rata share of estimated trading costs incurred in any underlying investment fund, if applicable.

^K The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of the portfolio securities, excluding short-term securities. For periods greater than six months, but less than a full fiscal year, the portfolio turnover rate is annualized.

Fidelity Canadian Monthly High Income ETF

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance was changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Commencement of Operations is January 16, 2020.

Annual Compound Returns

This table shows the Fund's historical annual compound total returns for the periods indicated, compared with a broad-based index, the S&P/TSX Capped Composite Index, and the Fund's benchmark, the Fidelity Canadian Monthly High Income Blend Index, as described below.

Average Annual Total Return	Past 1 year	Past 3 years	Since Inception
Series L	8.6%	4.6%	3.4%
Fidelity Canadian Monthly High Income Blend Index	8.1%	4.5%	3.9%
S&P/TSX Capped Composite Index	14.0%	9.1%	9.1%

A discussion of the performance of the Fund can be found in the Results of Operations section of this report.

The Fund is indexed to a blended Index. The blended index consists of 40.0% Fidelity Canada Canadian High Dividend Index, 20.0% Fidelity Canada Systematic Canadian Bond Index, 20.0% Bloomberg Global Aggregate Bond Index - Hedged CAD, 8.0% Fidelity Canada International High Dividend Index, 6.0% Fidelity Canada U.S. High Dividend Index, and 6.0% Fidelity Canada U.S. Dividend for Rising Rates Index.

The S&P/TSX Composite Index is an index of stocks that are generally considered to represent the Canadian equity market. The S&P/TSX Capped Composite Index is the same as the S&P/TSX Composite Index except that it is adjusted quarterly so that no single stock has a relative weight in the index greater than 10.0%.

The Bloomberg Global Aggregate Bond Index covers the most liquid portion of the global investment grade fixed-rate bond market, including government, credit and collateralized securities. On August 24, 2016, Bloomberg purchased the Barclays family of benchmark indices. As part of this transaction, all Barclays benchmark indices have been co-branded as the Bloomberg Barclays Indices for an initial period of 5 years.

The Fidelity Canada International High Dividend Index is designed to reflect the performance of stocks of large- and mid-capitalization developed international dividend-paying companies, excluding Canadian and U.S.-based companies, that are expected to continue to pay and grow their dividends. The universe of stocks for consideration in the index consists of the largest 1,000 developed international stocks, excluding Canadian and U.S.-based stocks, based on float-adjusted market capitalization.

The Fidelity Canada U.S. High Dividend Index is designed to reflect the performance of stocks of large- and mid-capitalization dividend-paying U.S. companies that are expected to continue to pay and grow their dividends. The universe of stocks for consideration in the index consists of the largest 1,000 U.S. stocks based on float-adjusted market capitalization.

Fidelity Canadian Monthly High Income ETF

Past Performance – continued

The Fidelity Canada U.S. Dividend for Rising Rates Index is designed to reflect the performance of stocks of large- and mid-capitalization dividend-paying U.S. companies that are expected to continue to pay and grow their dividends and have a positive correlation of returns to increasing 10-year U.S. Treasury yields. The universe of stocks for consideration in the index consists of the largest 1,000 U.S. stocks based on float-adjusted market capitalization.

The Fidelity Canada Canadian High Dividend Index is designed to reflect the performance of stocks of large- and mid-capitalization Canadian dividend-paying companies that are expected to continue to pay and grow their dividends. The universe of stocks for consideration in the index consists of the largest 300 Canadian stocks based on float-adjusted market capitalization.

The ICE BofA BB-B U.S. High Yield Constrained Index is a market capitalization-weighted index of below investment grade U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market. The index includes securities with a credit rating of BB-B. In 2017, Intercontinental Exchange acquired the BofAML Global Research FICC Index platform. This has resulted in all Bank of America Merrill Lynch benchmarks being renamed as BofAML indices. Effective January 1, 2020, the ICE BofAML indices were rebranded as ICE BofA indices.

The Fidelity Canada Systematic Canadian Bond Index tracks the performance of CAD denominated investment grade debt publicly issued in the Canadian domestic market, including sovereign, quasi-government, corporate, securitized and collateralized securities. With the exception of local currency sovereign debt, qualifying securities must have an investment grade rating based on an average of Moody's, S&P and Fitch. Qualifying securities must have at least one month remaining term to final maturity, at least 18 months to final maturity at point of issuance and a fixed coupon schedule. Callable perpetual securities qualify provided they are at least one year from the first call date. Fixed-to-floating rate securities also qualify provided they are callable within the fixed rate period and are at least one year from the last call prior to the date the bond transitions from a fixed to a floating rate security.

Fidelity's ETFs are sold by registered brokers and dealers. Each ETF has a prospectus, which contains important information on the ETF, including its investment objective and applicable fees. Please obtain a copy of the prospectus, read it carefully, and consult your registered broker or dealer before investing. As with any investment, there are risks to investing in ETFs. There is no assurance that any ETF will achieve its investment objective, and its net asset value, yield, and investment return will fluctuate from time to time with market conditions. Investors may experience a gain or loss when they sell their securities in any Fidelity ETF. Past performance is no assurance or indicator of future returns. The breakdown of ETF investments is presented to illustrate the way in which an ETF may invest, and may not be representative of an ETF's current or future investments. An ETF's investments may change at any time.
