Caution Regarding Forward-looking Statements

Certain portions of this report, including, but not limited to, “Results of Operations” and “Recent Developments”, may contain forward-looking statements about the Fund, including its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as “expects”, “anticipates”, “intends”, “plans”, “believes”, “estimates” and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Accordingly, assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

Annual Management Report of Fund Performance as at March 31, 2024

Fidelity U.S. High Dividend Currency Neutral ETF

This annual management report of fund performance contains financial highlights but does not contain the complete annual financial statements for the investment fund. You can get a copy of the annual financial statements at your request, and at no cost, by calling 1-800-263-4077, by writing to us at Fidelity Investments, 483 Bay St. Suite 300, Toronto ON M5G 2N7 or by visiting our website at www.fidelity.ca or SEDAR+ at www.sedarplus.ca.

Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record or quarterly portfolio disclosure relating to the investment fund.

Management Discussion of Fund Performance

Investment Objective and Strategies

Investment Objective: Fidelity U.S. High Dividend Currency Neutral ETF (Fund) seeks to replicate, to the extent reasonably possible and before fees and expenses, the performance of the Fidelity Canada U.S. High Dividend Currency Neutral Index (Index). The Fund invests primarily in dividend-paying equity securities of U.S. companies. The Fund can invest in these securities either directly or indirectly through investments in other underlying funds. The Fund uses derivatives to try to minimize the exposure of currency fluctuations between the U.S. and Canadian dollars.

Strategies: In order to achieve its investment objective, the Fund normally holds securities of Fidelity U.S. High Dividend ETF (Underlying Fund) and then uses derivatives to try to minimize the exposure of currency fluctuations between the U.S. and Canadian dollars.

The Index is designed to reflect the performance of stocks of large- and mid-capitalization dividend-paying U.S. companies that are expected to continue to pay and grow their dividends. The universe of stocks for consideration in the Index consists of the largest 1,000 U.S. stocks based on float-adjusted market capitalization. The Index hedges its U.S. dollar currency exposure to the Canadian dollar.

The Index is provided by Fidelity Product Services LLC (the Index Provider). The Index represents an example of what is commonly referred to as a smart beta investment methodology. Smart beta refers to alternative index construction rules compared to the traditional market capitalization-based approach. The Index is constructed using the Index Provider's rules-based proprietary index methodology and is designed to provide investors with exposure to targeted strategic factors.

Securities are identified for inclusion in the Index based on their composite factor score, which is a weighted-average score based on three dividend factors: (i) dividend yield; (ii) payout ratio; and (iii) dividend growth. Dividend yield is calculated based on trailing dividends over the last twelve months over price per share. Payout ratio is calculated based on trailing dividends over the last twelve months over earnings per share. Dividend growth is calculated based on trailing dividends over the last twelve months over dividends from one year ago. Composite factor scores for the Index are calculated by weighting dividend yield at 70%, payout ratio at 15% and dividend growth at 15%. Composite scores are adjusted to remove size bias by blending the composite score with a size factor. Within each sector, securities are selected based on the size-adjusted composite score. Groups with higher dividend yields are overweighted, while those with lower dividend yields are underweighted.

The Index is rebalanced on an annual basis on the third Friday of February using data as at the close of business on the day that is 10 business days prior to the scheduled rebalance.

The Index Provider's website, at <https://research2.fidelity.com/pi/FidelityIndex/RebalanceSchedules>, provides more detailed information on the Index methodology.

Risk

The risks associated with investing in this Fund remain as discussed in the prospectus. Any changes in the Fund over the period have not affected the overall level of risk of the Fund.

The Fund is suitable for medium- to long-term investors who want to gain exposure to dividend-paying equity securities of U.S. companies while seeking to lower their risk of currency fluctuations between the U.S. and Canadian dollars, who can handle the volatility of returns generally associated with equity investments, and who are seeking income and the potential for capital gains and are willing to accept a medium to high level of risk. Effective April 25, 2023, the Fund's risk rating has changed from medium to "medium to high". As part of regularly scheduled reviews, it was determined that the Fund's risk rating should be medium to high. The suitability of the Fund has not changed from what has been disclosed in the prospectus.

Results of Operations

Fidelity U.S. High Dividend Currency Neutral ETF returned 16.6%, after fees and expenses, for the one-year period ending March 31, 2024. The S&P 500 Index – Hedged CAD, broadly representative of the U.S. equity market, returned 28.5% (in Canadian dollar terms) for the same period.

Market overview:

Fidelity U.S. High Dividend Currency Neutral ETF

Management Discussion of Fund Performance – continued

U.S. equities, as measured by the S&P 500 Index, returned 29.9% in Canadian dollar terms and 29.9% in U.S. dollar terms, for the one-year period ended March 31, 2024.

U.S. equities rose during the review period, buoyed by signs of easing inflationary pressures, strong corporate earnings, and persistent economic growth. Positive investor sentiment around microchip manufacturers and companies with exposure to artificial intelligence supported growth in U.S. equities. Additionally, equity markets were supported by the U.S. Federal Reserve's rate-cut projections which generally showed that policymakers expect to cut rates in 2024. The U.S. economy expanded at an annual rate of 3.4% in the fourth quarter of 2023. Moreover, throughout the period, investor sentiment improved in anticipation of a resilient economy and the potential for continued moderation in inflation. These factors provided a favourable environment for equities against the backdrop of monetary tightening throughout 2022 and for most of 2023. In the policy meeting held in March 2024, the U.S. Federal Open Markets Committee held the Federal Funds rate unchanged to a target range of 5.25%–5.50%.

Factors affecting performance:

The Fund's benchmark, the Fidelity Canada U.S. High Dividend Currency Neutral Index, returned 16.1% during the review period. The Fund outperformed the Index over the period under review. Typically, the reason for the difference in returns between the Fund and the Index was that the total return of the Fund was reduced by the management fee paid or payable by the Fund, as well as brokerage and commission costs incurred in acquiring and rebalancing the portfolio of securities held by the Fund, and taxes (including withholding taxes, where applicable) and other expenses paid or payable by the Fund. These fees and expenses are not included in the calculation of the performance of the Index.

On an absolute basis, the Underlying Fund's exposure to U.S.-based semiconductor company Nvidia, U.S.-based technology company Microsoft, and U.S.-based financial holding company J.P. Morgan Chase & Co. contributed to returns, while exposure to U.S.-based health care real estate investment trust Medical Properties Trust, U.S.-based media and entertainment company Paramount Global, and U.S.-based gold mining company Newmont detracted from returns.

At the end of the review period, the Underlying Fund had no exposure to Medical Properties Trust or Paramount Global.

Portfolio changes:

At the sector level, relative to the S&P 500 Index – Hedged CAD, the Underlying Fund had its highest relative weightings in the energy, materials, and real estate sectors, and its lowest relative weightings in the communication services, health care and consumer discretionary sectors.

The Index is rebalanced on an annual basis on the third Friday of February using data as at the close of business on the day that is ten business days prior to the scheduled rebalancing activity. Accordingly, the composition of the Fund may change, resulting in different sector and security weightings.

Derivatives disclosure:

During the period under review, the Fund engaged in forward foreign currency contracts, in a manner consistent with its investment objectives and strategies, to hedge against the effect of currency fluctuations on the investment returns of the Fund. The use of forward contracts in this manner does not completely eliminate the impact of currency fluctuations on returns and the Fund's returns will differ from the local currency returns of the Underlying Fund's investments.

Recent Developments

Since the investment objective of the Fund is to seek to replicate, to the extent possible before fees and expenses, the performance of the Index, the Fund is not actively managed by traditional methods. Consequently, the Fund will continue to be invested in securities in accordance with its investment objective and strategies and will generally not be affected by market developments unless the constituent securities included in the Index change in response to those developments.

Effective September 19, 2023, Anne Bell of Mississauga, Ontario, became a member of the Independent Review Committee (IRC).

Effective December 1, 2023, the word "Index" was removed from the Fund's name.

Related Party Transactions

Manager and Portfolio Adviser

The Fund is managed by Fidelity Investments Canada ULC (Fidelity). Fidelity is part of a broader group of companies collectively known as Fidelity Investments.

Fidelity provides or arranges for the provision of all general management and administrative services required by the Fund in its day-to-day operations, bookkeeping, record-keeping and other administrative services for the Fund.

Fidelity U.S. High Dividend Currency Neutral ETF

Management Discussion of Fund Performance – continued

Fidelity is the portfolio adviser to the Fund and it provides investment advisory services to the Fund. Fidelity provides investment advice with respect to the Fund's investment portfolio and arranges for the acquisition and disposition of portfolio investments, including all necessary brokerage arrangements.

The Fund pays Fidelity a monthly management and advisory fee for their services, based on the net asset value of each Series, calculated daily and payable monthly. The Fund paid Fidelity management and advisory fees of \$13,000 for the period ended March 31, 2024.

Independent Review Committee, Cross-Trading and *In specie* Transactions

Independent Review Committee

Fidelity has established an independent review committee (IRC) that acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals respecting conflict of interest matters referred to it by Fidelity. The IRC prepares, at least annually, a report of its activities for securityholders of the Fund. The report is available at www.fidelity.ca or at the securityholder's request at no cost by contacting Fidelity, using the contact information available on the final page of this document.

Cross-Trading and *In specie* Transactions

The Fund received the approval and standing instructions from the IRC in order to:

- (i) engage in cross-trading, which is a form of interfund trading. A cross-trade occurs when the Fund purchases or sells portfolio securities from or to another Fund, a U.S. fund or a separately managed account, through a broker;
- (ii) permit the Fund, in certain circumstances, to purchase and redeem Fund securities in consideration for securities rather than cash of another Fund, investment fund or a separately managed account, managed by Fidelity.

For each of the transactions in (i) and (ii) above, the IRC's standing instructions require Fidelity to act in accordance with its associated policies and procedures and applicable law, and comply with the conditions in each of the exemptive relief orders received, which, in the case of cross-trading, requires additional periodic reporting to the Ontario Securities Commission. The standing instructions also require that investment decisions in respect of these transactions (a) are free from any influence by an entity related to Fidelity and without taking into account any consideration relevant to an entity related to Fidelity; (b) represent the business judgment of Fidelity uninfluenced by considerations other than the best interests of the Fund; (c) comply with the applicable policies and procedures of Fidelity; and (d) achieve a fair and reasonable result for the Fund.

Brokerage Commissions

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of Fidelity Investments, including National Financial Services LLC, provided it determines that these affiliates' trade execution abilities and costs are comparable to those of non-affiliated, qualified brokerage firms, on an execution-only basis. Commissions paid to brokerage firms that are affiliates of Fidelity Investments were \$0 for the period ended March 31, 2024. Fidelity receives standing instructions from the IRC in respect of policies and procedures governing best execution of transactions with affiliates, which includes brokers affiliated to Fidelity Investments, at least once per year.

Financial Highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the period end of the years shown. This information is derived from the Fund's audited annual and/or unaudited semi-annual financial statements. Please see the front page for information about how you can obtain the Fund's annual or semi-annual financial statements.

Net asset value per security, end of period	\$30.5220	\$26.9300	\$30.4957	\$26.0797	\$16.9680

^A This information is derived from the Fund's audited annual and/or unaudited interim financial statements. The net assets attributable to securityholders per security presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to financial statements. For reporting periods ending after January 1, 2017 per security comparative figures (except for net asset value per security, end of period) have been conformed to the current rounding presentation of two decimal places.

^B Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of securities outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per security.

^C Prior period amounts may have been adjusted.

^D Distributions were paid in cash or reinvested in additional securities of the Fund, or both, and excludes any applicable distributions of management fee reduction to securityholders. Distributions are presented based on management's best estimate of the tax character.

^E This information is provided as at period end of the year shown.

^F Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset values during the period, including the Fund's pro-rata share of estimated expenses incurred in any underlying investment fund, if applicable, (2024: .39%, 2023: .39%, 2022: .39%, 2021: .39%, 2020: .40%).

^G The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period, including the Fund's pro-rata share of estimated trading costs incurred in any underlying investment fund, if applicable.

^H The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of the portfolio securities, excluding short-term securities. For periods greater than six months, but less than a full fiscal year, the portfolio turnover rate is annualized.

Fidelity U.S. High Dividend Currency Neutral ETF

Past Performance

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance was changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

Commencement of Operations is September 13, 2018.

Annual Compound Returns

This table shows the Fund's historical annual compound total returns for the periods indicated, compared with a broad-based index, the S&P 500 Index - Hedged CAD, and the Fund's benchmark, the Fidelity Canada U.S. High Dividend Currency Neutral Index, as described below.

Average Annual Total Return	Past 1 year	Past 3 years	Past 5 years	Since Inception
Series L	16.6%	8.3%	8.4%	7.0%
Fidelity Canada U.S. High Dividend Currency Neutral Index	16.1%	8.0%	7.9%	6.5%
S&P 500 Index - Hedged CAD	28.5%	10.5%	13.7%	11.8%

A discussion of the performance of the Fund can be found in the Results of Operations section of this report.

The Fidelity Canada U.S. High Dividend Currency Neutral Index is designed to reflect the performance of stocks of large- and mid-capitalization dividend-paying U.S. companies that are expected to continue to pay and grow their dividends. The Index hedges its U.S. dollar currency exposure to the Canadian dollar. The universe of stocks for consideration in the Index consists of the largest 1,000 U.S. stocks based on float-adjusted market capitalization. The Fund is not sponsored, endorsed, sold, or promoted by Fidelity Product Services LLC. Fidelity Product Services LLC makes no representation regarding the advisability of investing in the Fund. The Prospectus contains a more detailed description of the limited relationship Fidelity Product Services LLC has with Fidelity Investments and any related funds.

The S&P 500 Index is a widely recognized index of 500 U.S. common stocks of large and mid-capitalization companies.

Fidelity U.S. High Dividend Currency Neutral ETF

Summary of Investment Portfolio as at March 31, 2024

Sector Mix

	% of Fund's Net Assets as at 3/31/24	% of Fund's Net Assets as at 3/31/23
Information Technology	22.8	19.3
Consumer Staples	13.1	0.0
Energy	12.4	11.6
Materials	10.4	10.1
Real Estate	10.2	9.0
Utilities	9.7	0.0
Financials	6.9	19.8
Health Care	5.9	7.4
Consumer Discretionary	3.6	3.8
Industrials	2.9	3.4
Communication Services	1.6	14.0
Others (Individually Less Than 1%)	0.0	0.4
Cash and Cash Equivalents	0.0	0.2
Net Other Assets (Liabilities)	0.5	1.0

Comparative balances, as applicable, have been reclassified to align with current period presentation.

Market Capitalization

	% of Fund's Net Assets as at 3/31/24	% of Fund's Net Assets as at 3/31/23
Large	99.3	92.7
Mid	0.5	7.0
Small	0.0	0.0

Market Capitalization is a measure of the size of a company. It is calculated by multiplying the current share price by the number of outstanding common shares of the company. The Fund defines small cap as less than \$2 billion, mid cap as between \$2 billion and \$10 billion, and large cap as over \$10 billion in capitalization.

Derivative Exposure

	% of Fund's Net Assets as at 3/31/24	% of Fund's Net Assets as at 3/31/23
Futures Contracts	0.2	0.3
Forward Foreign Currency Contracts	0.3	1.0

Futures Contracts percentage is calculated by dividing the sum of the notional amount by total net assets.

Forward Foreign Currency Contracts percentage is calculated by dividing the net unrealized gain/loss of all contracts held by total net assets.

Where applicable, the information in the above tables includes the Fund's pro-rata share of the investment in any Fidelity managed underlying fund.

Comparative balances, as applicable, have been reclassified from country of incorporation to country of risk to align with current period presentation.

All tables within the Summary of Investment Portfolio section, except the Top Issuers table, contain audited information.

The Fund uses derivatives to try to minimize the exposure to currency fluctuations between foreign currencies in developed markets and the Canadian dollar. Any exposure to emerging market currencies cannot be hedged as an economic market for hedging these currencies does not exist.
